

First Wave Trader Core Indicator Package

Features

The First Wave Trader Indicator Package combines the following six powerful indicators. These are the core indicators used by David Elliott at Wall Street Teachers. These studies are available in both TradeStation and NinjaTrader 7 trading platforms.

Trend Indicators

- **HOB0** – High Opportunity Breakout – Overlays the price chart with cloud bands indicating trend breakouts.
- **DPOFuelCells** – Price Oscillator with Fuel Cells

Snapback Indicators

- **Triple CCI** – Identifies overbought/oversold levels, price reversals, price extremes and trend strength.
- **LRChannels** – Linear Regression finds overbought/oversold areas.
- **SUDS** – Super Dual Stochastic Study – Identifies patterns that are high probability of tops and bottoms.
- **TTG** – Thrust Target Gauge – A proprietary study that determines price turning points and gauges the next movement.

Bonus

- **ATRTick Counter** – Will show the current ATR value and a countdown in ticks or % when used on a Volume or Tick Chart.

Price

The indicator package is priced at \$399.95
